DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-25, drawn to an apparatus for vehicle wash, classified in class 134, subclass 123.
 - II. Claims 26-40, drawn to a method of assembling an apparatus for vehicle wash, classified in class 470, subclass various.
 - III. Claims 41-45, drawn to a method for washing a vehicle, classified in class 134, subclass 10.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the device as claimed can be assembled by a materially different process leaving a wash structure in a trailer and assembling such structure inside the trailer vs. doing it on a parking space.
3. Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP §

Art Unit: 1746

806.05(e)). In this case the process as claimed can be practiced either by hand holding the hose, which method is widely used, or by a materially different apparatus, such as for example apparatus providing recirculation and reuse of substantial portion of washing liquid, wherein the apparatus is a cascade of washing tanks .

4. Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions of assembling the apparatus and method of using the apparatus for washing vehicles are not disclosed as being capable of used together, because the method of making of apparatus, even if different from the instantly claimed can very well lead to the same apparatus, and therefore has different functions, different modes of operation and different effect related to a method of using of the apparatus.

5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II and III, restriction for examination purposes as indicated is proper.

7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
